

SILVER AND BRONZE

Carrol has transformed her sculptural designs into a remarkable new range of silver and bronze jewellery.

This stylish collection, simple and distinctive, is reminiscent of her best known pewter designs.

The silver pieces are chunky, yet surprisingly lightweight due to their manufacturing process, and reveal yet another fascinating divergence from her classic homeware range.

The bronze pieces, redolent of a bygone era, but with a distinctly updated look and feel, will bring a new elegance to your personal collection.
